YOU ARE A DIVINE ORIGINAL

There is no other person like you in the whole universe. Take a moment to let that sink in. That there is no other person like you out of the 7.2 billion people all over the world should make you feel very excited yet humbled. Renowned fingerprint scientist Sir Francis Galton calculated that the probability of two whole fingerprints matching and found that to be somewhere around one in 64 billion (1.5625e-13%) — making your fingerprints uniquely yours out of the 7.2 billion people around the world. You iris (eyes), tongue, gait, and ears are unique. And as unique as you are, God knows you to every detail. That's deep, isn't it? Isaiah 43:1 indicates that God knows us all by name. God knows us at the genetic level – the level of our DNA. In Luke 12, Jesus talks to His followers about how much personal interest God takes in them. The detail he mentions is that "the very hairs of your head are all numbered." The creative abilities of Eugene H. Peterson makes this more beautiful in Psalm 139:14-16: "Body and soul, I am marvelously made!..bit by bit, how I was sculpted from nothing into something" Each of us has been carefully modeled and designed to provide a unique contribution. You are a divine original. So next time you look in the mirror, remember that there is no other person who looks exactly like you. That you are unique then means your life cannot be a waste, it cannot be useless. That you are absolutely distinct then brings on some sense responsibility to fulfill your unique roll on earth. Reflection points for this week

Take a moment to think about yourself starting today and for the rest of this week. Does it look like you are appearing more and more like a fake or counterfeit because you have copied other people's lifestyle instead of looking into God's word for divine inspiration for your life?

In what way do you think you can experience a newness in your life? What steps or change do you need to make to experience a new reality?

The environment you are goes a long way so do you think you are in the right environment to stir up fresh vitality?
